

Attendees: Dr Annabelle Juhasz, David Hoppe, Brian Kanyer, Joy Schmidt, Jim Neulieb, Martha Maust

Land Conservation Committee Minutes November 1, 2017

Called to order at 430PM

Dr Juhasz expressed appreciation to the Beacher article about the Eagle Scout project by Danny Thalman to install benches, bike racks, and way finding signs for the path in the Long Beach woods.

David Hoppe has been investigating options for a tree ordinance. Most tree ordinances address trees in public space. Common to all tree ordinances is that there is an arborist on staff of that town.

A tree ordinance that addresses trees on private property would be to emphasize the value that trees provide.

Juhasz suggested that a seminar would be provided on proper tree planting and care for the public. Brian will call the forester to see if he would be willing to do a presentation.

Hoppe encourages Long Beach residents to attend a meeting held at Save the Dunes headquarters about development in Michigan City along the lake front.

Meeting adjourned at 5:30PM

Respectfully submitted,
Martha Maust
